

Reduce Digital Risk by 60% with GreyMatter Digital Risk Protection

Graham Gibney

GreyMatter Engineer, ReliaQuest

Your Biggest Threats Are Happening Outside Your Perimeter

SaaS platforms Targeted

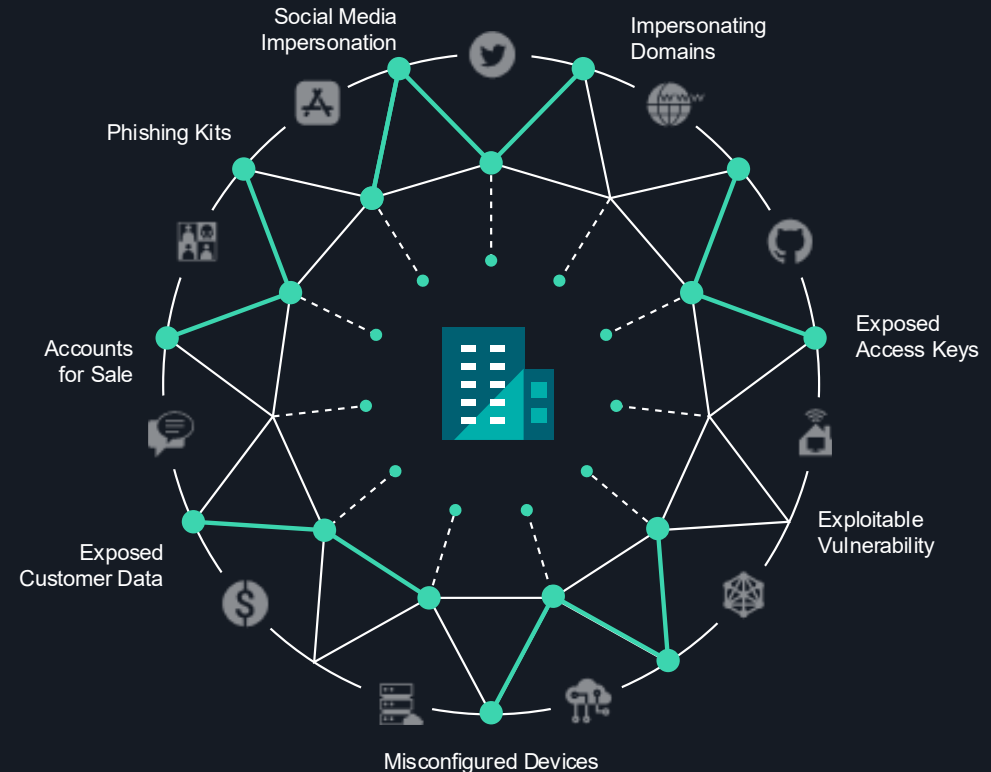

ShinyHunters and similar groups use impersonating domains and social engineering to steal SaaS credentials and exploit trust.

47% of alerts began with high-privilege access

By targeting identity first, adversaries gain elevated privileges immediately, skipping escalation entirely.

Beyond the firewall

Your brand, executives, and data are external targets. Traditional security tools lack the visibility to protect assets beyond your firewall.

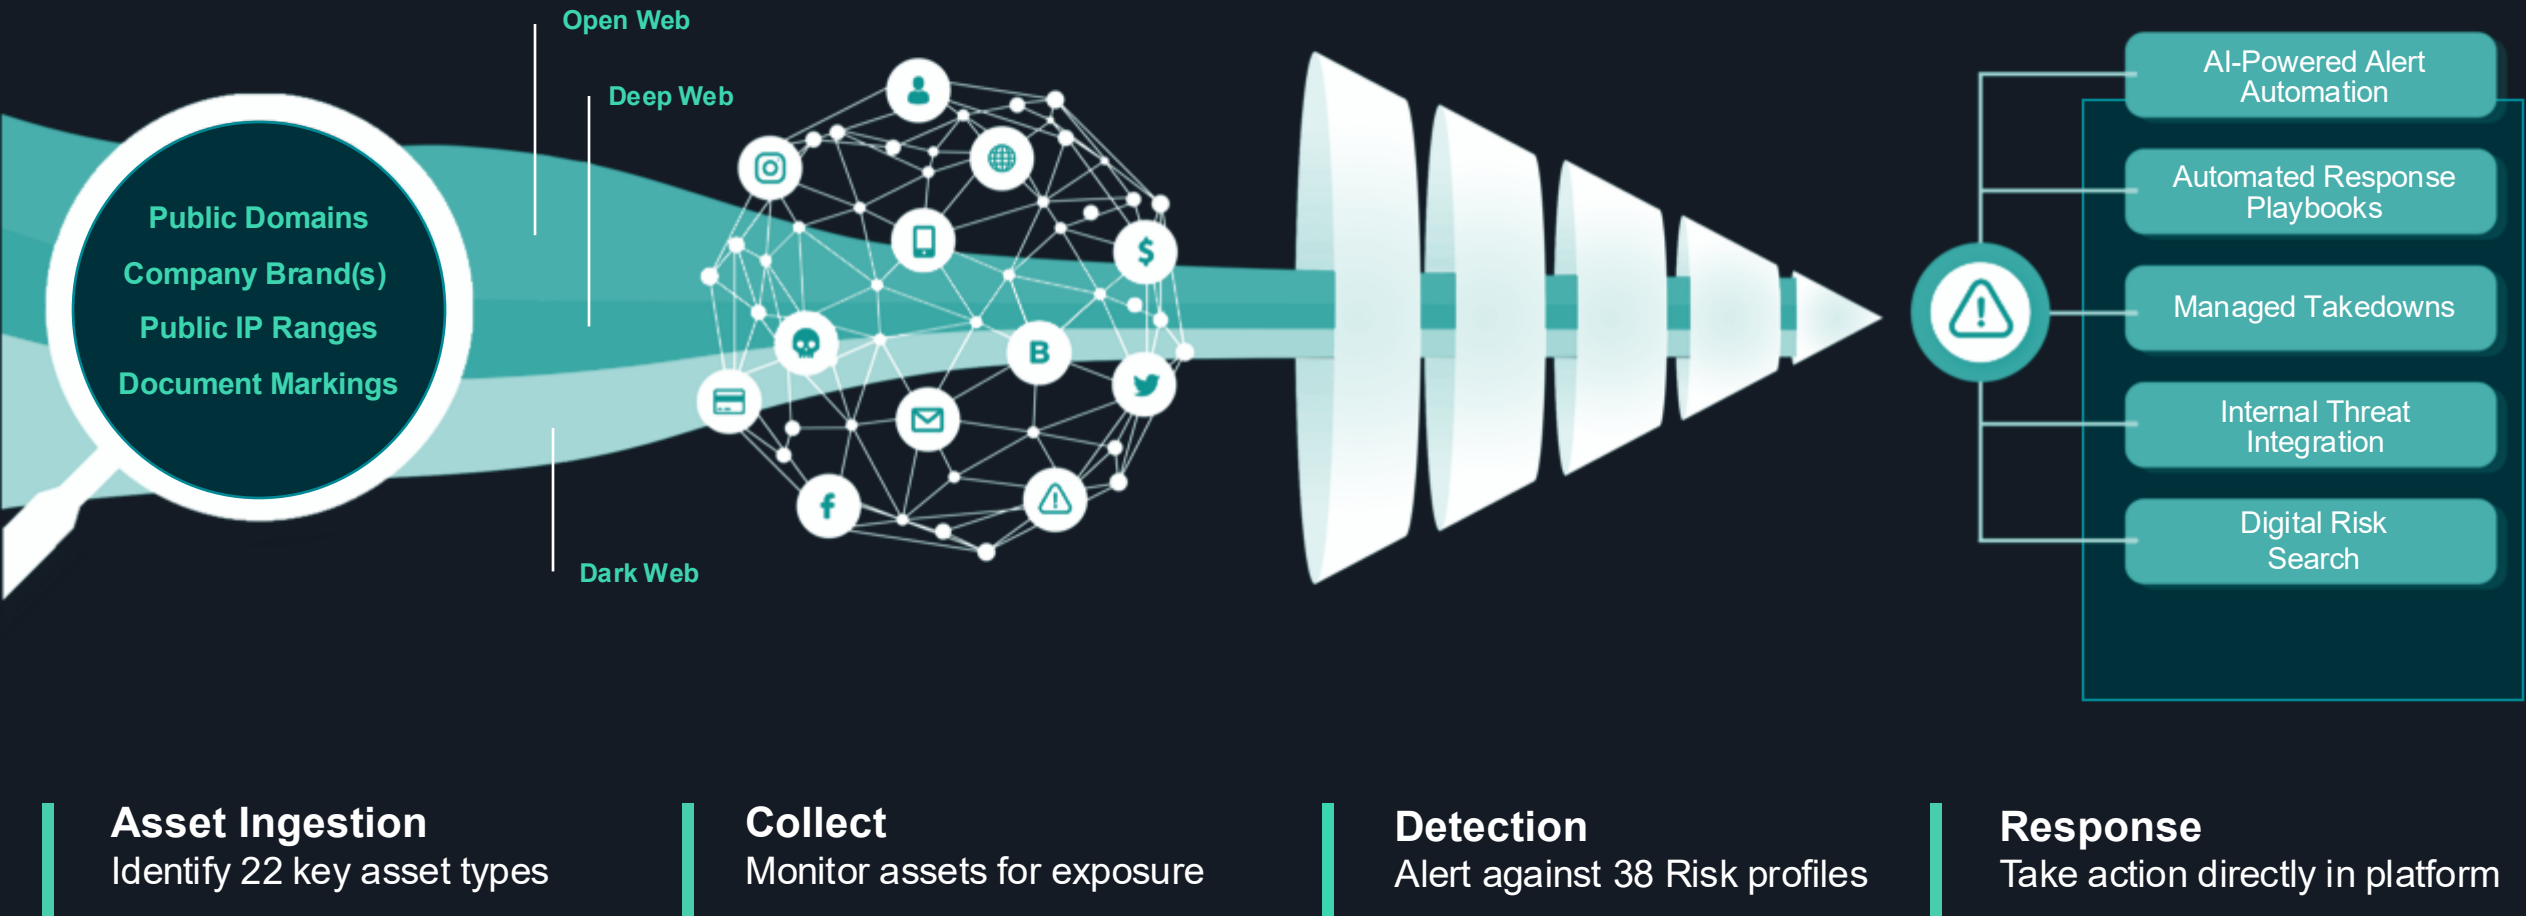

What Challenges Do You Face with Securing Beyond The Perimeter?

- Knowing what you own
 - Shadow domains, forgotten infrastructure, etc.
- Third-Party Infrastructure
 - Their risk is your risk
- Too much noise, not enough findings
 - Leaked credentials with no validation
- Disconnected from Security Operations:
 - Findings don't flow into DIR and response actions doesn't flow back

GreyMatter Digital Risk Protection

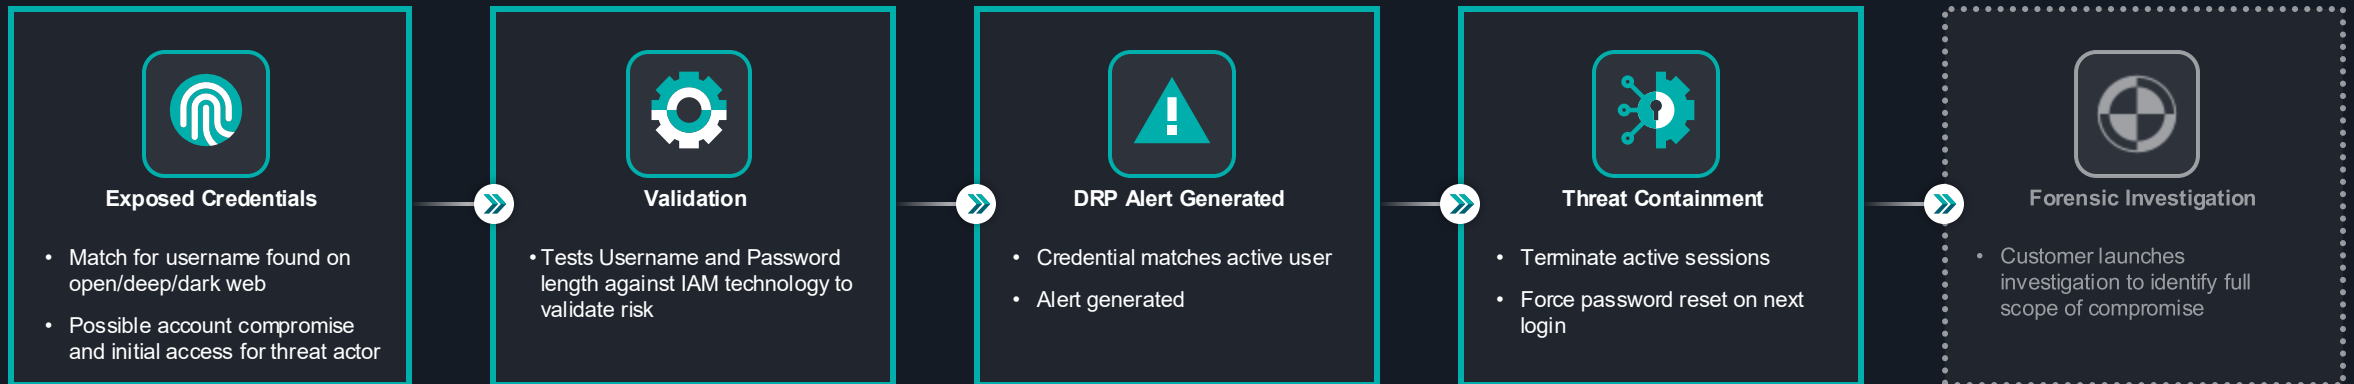

Extending Visibility, Attack Warning, and Automated Response Outside of Your Network

Example of End-to-End Exposed Compromised Credentials

< 5 Minutes

GreyMatter DRP identified, validated, and reset credentials for each impacted user

GreyMatter + DRP

What We Are Seeing Across Deployments

3,785+

Takedowns

16%

Customers where we detected digital risk early through IR alerts before DRP alerts

60%

Decrease in Digital Risk

DRP Roadmap

Now	Next	Later
DRP in GreyMatter Chat Use GreyMatter Chat to be able to query in natural language about DRP alerts	VIP Monitoring Understand the exposure and risks to your key staff members.	Brand Sentiment Monitoring Awareness and monitoring of what people are saying about your company and brand.
Impersonating Domain Improved domain similarity and logo matching for higher accuracy brand protection	Password Validation for Exposed Credentials Validation of passwords beyond just character and length policies.	
Natural Language Searching Search DRP sources and collections using natural language	DRP and IR Alert Correlation Assess whether DRP and IR incidents are connected in the same event	
Community Intel A community feed of indicators from ReliaQuest's community.	Takedown Automation Automated workflows from the alert being raised and faster takedown processes.	

Thank you
